

CAA
INDUSTRIES

CAAINDUSTRIES.COM

To Our Valued Customers:

We are happy to announce that the dispute between **CAA Industries** and **CAA USA** has come to an end.

With that in mind, we would like to clear any confusion in the market.

We are the home of the **Roni** and **Micro Roni** products and they were invented in Israel by **CAA INDUSTRIES** and are owned by **CAA INDUSTRIES** exclusively.

CAA Industries and Moshe Oz are the original innovators of the world-famous patented **RONI/MICRO RONI** conversion kits as the **RONI** is named after Moshe Oz's daughter.

CAA USA / CAAGEARUP.com / ME Technologies - which all represent the same entity, used to be CAA Industries' official US Distributor. They are no longer associated with CAA Industries after an agreement was made between the two parties.

The **MCK** is **NOT** "The next generation of the Micro Roni" as it does not utilize some of the features of the patent such as the trigger guard.

The **MCK** is a different product that is manufactured and owned by CAA USA.
CAA INDUSTRIES is a separate entity from CAA USA.

Only CAA Industries resellers are allowed to use the trademarks **RONI** and **MICRO RONI**.
Resellers of the **MCK** are requested to remove the trademark **RONI** from their marketing and product pages.

Now that an agreement has been made, CAA Industries is off to a new start filled with new patents and upcoming innovative products.

We hope this clarifies any questions you may have.

Thank you for your continued support, and stay tuned for updates coming soon!

Sincerely,
Moshe Oz
